

SecureDX™ Beta: Quick Start Guide

A more secure way to safely send digital files between known devices.

1

Activate Account

SecureDX™

Activate Account

Your account will only be accessible from this browser. To access your account from a different browser, your account must be reactivated on that browser. If you register in private browsing mode, your account will need to be reactivated if the browser window is ever closed.

Privacy Policy

If you clicked the link in the verification email, then your account is already activated, and you will NOT see this screen.

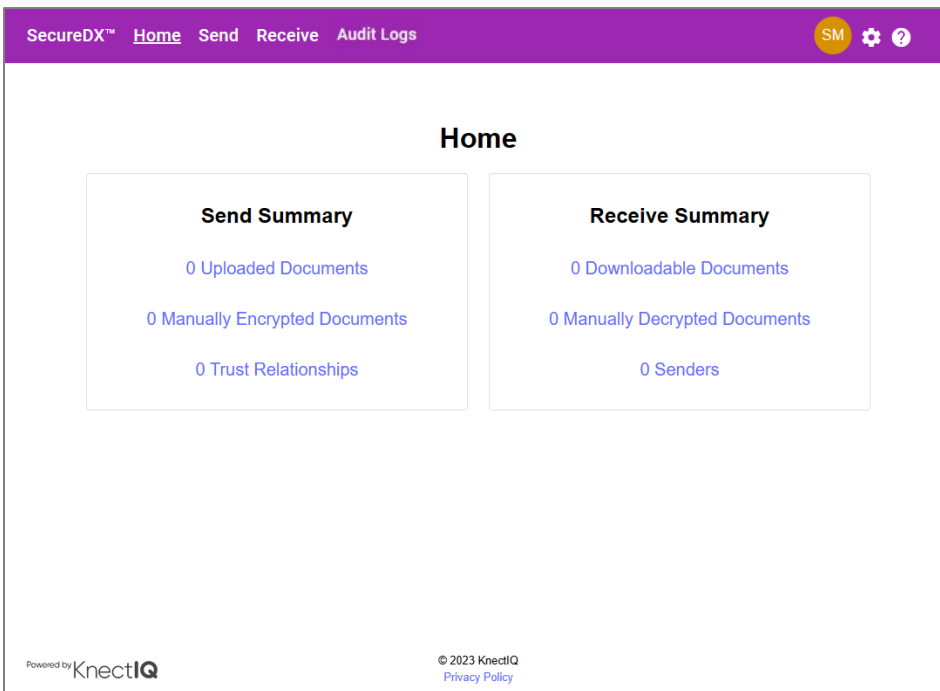

If you did NOT receive a verification email, or you need to re-activate your account, follow the steps below.

Steps:

- ✓ Go to: <https://beta.knectiqdx.com>
- ✓ Enter your email address
- ✓ Select "Activate"
- ✓ Click the link in the verification email
- ✓ Activation is complete

NOTE: You can close the browser with which you registered your account and, provided you continue to use the same browser (e.g. Chrome) to access SecureDX, you will not see this screen again. If you change from one browser to another (e.g. move from Chrome to Edge) or change devices altogether (e.g. Chrome on your PC to Chrome on your phone) and attempt to access SecureDX from the different browser, you will need to reactivate your account using the steps above.

Home: Introduction

The screenshot displays the SecureDX Home dashboard. At the top, a purple navigation bar contains the text "SecureDX™ Home Send Receive Audit Logs" and icons for "SM", a gear, and a question mark. The main content area is titled "Home" and features two summary cards. The "Send Summary" card on the left lists: "0 Uploaded Documents", "0 Manually Encrypted Documents", and "0 Trust Relationships". The "Receive Summary" card on the right lists: "0 Downloadable Documents", "0 Manually Decrypted Documents", and "0 Senders". At the bottom left, it says "Powered by KnectIQ". At the bottom right, it says "© 2023 KnectIQ" with a link to "Privacy Policy".

This is the home screen after successful registration of your account.

The Send and Receive summaries listed here operate like a dashboard to show relevant recent activity.

Account management activities can be accessed by clicking on the  gear icon in upper right.

Got questions or feedback related to SecureDX? Use the  question mark icon to access the support email address.

2

Set Up Trust Relationships

A trust relationship is a secure communication channel for sending and receiving files. Prior to being able to send or receive secure files, a trust relationship must exist. SecureDX only allows the designated receiver identified in a trust relationship to download files you send.

SecureDX™ Home Send Receive Audit Logs

SecureDX > Send > Add Trust Relationship

Add Trust Relationship

A trust relationship is a secure communication channel for sending documents to another user.

Select Receiver*

Receiver

ADD TRUST RELATIONSHIP

Powered by KnectIQ © 2023 KnectIQ Privacy Policy

Select "Send" from the top navigation bar.

Select a receiver from the drop-down list.

*Note: Names you see in this list are all eligible receivers with whom you may establish a trust relationship. New eligible receivers are added to your group list as they join the Beta.

2

Set Up Trust Relationships

SecureDX™ Home Send Receive Audit Logs SM ?

SecureDX > Send > Add Trust Relationship

Add Trust Relationship

A trust relationship is a secure communication channel for sending documents to another user.

Select Receiver*

First Last (first.last@email.com)

Receiver

Also create a Trust Relationship allowing First Last to send documents to you. If you're not sure, First Last can do this later.

ADD TRUST RELATIONSHIP

Powered by KnectIQ © 2023 KnectIQ Privacy Policy

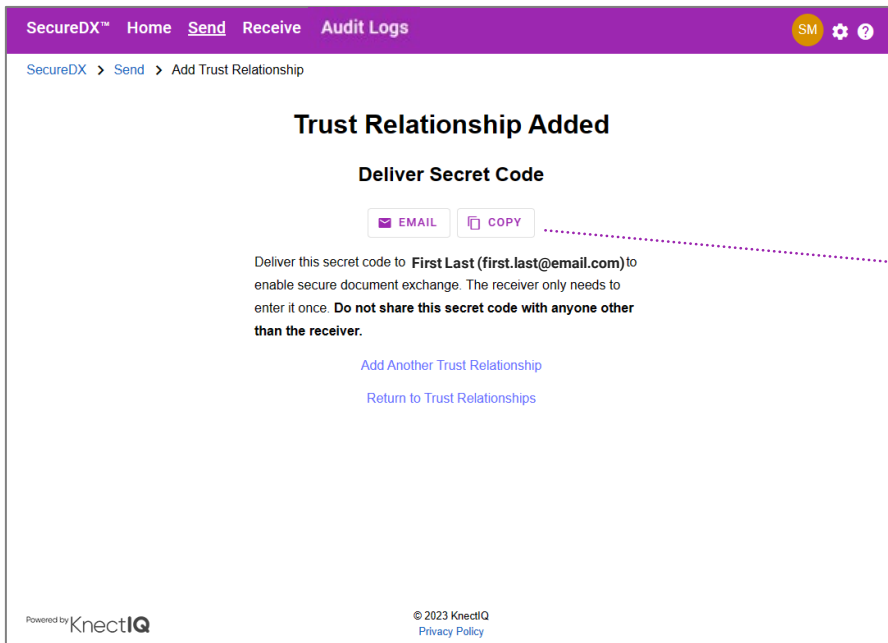

Once a receiver has been selected, you may choose to select the checkbox to enable SecureDX to create a two-way trust relationship, allowing the receiver (once registered) to both receive and send files to you.

Choose “Add Trust Relationship”

2 Set Up Trust Relationships: Secret Code

A secret code is generated by SecureDX for every sender, and it is specific to a trust relationship. The receiver in this trust relationship must enter this secret code (only once and only the first time) to be able to use SecureDX to decrypt files you send to them.

You must deliver the secret code to the receiver.

1. Choosing EMAIL will provide the secret code and instructions for the recipient to follow for entering the code into SecureDX. Copy/paste this information into your email client and send to receiver.
2. Choosing COPY will simply copy the secret code to your computer clipboard so you may paste it into the delivery mechanism you choose.

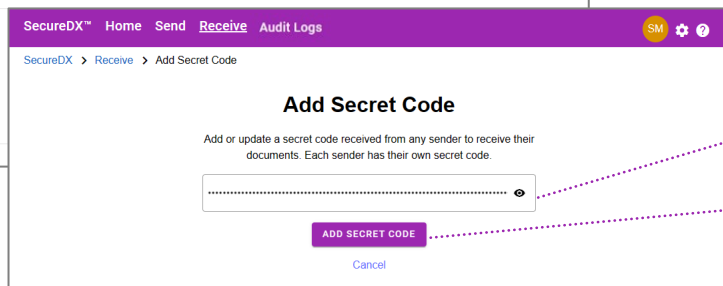

2

Set Up Trust Relationships: Receiver Entry of Secret Code

✓ Select "Receive" tab

✓ Select "Add Secret Code"

✓ Paste the secret code you received from the Sender into this box

✓ Select "Add Secret Code"

✓ The receiver completes these steps just once, and only the first time. Now the receiver may use SecureDX to decrypt files sent to them using this trust relationship.

2

Set Up Trust Relationships: Secret Code Copy or Regenerate

SecureDX™ Home [Send](#) Receive Audit Logs SM ⚙️ ?

SecureDX > Send

Trust Relationships

Click the Add Trust Relationship icon **+** to create a new Trust Relationship.

Receiver Name	Receiver Email	Created	Uploaded	Manual	
First Last	First Last (first.last@email.com)	Apr 25, 2023, 12:48 PM	0	0	🔍 ⚙️ 🗑️

Secret codes may be copied or regenerated by the sender at any time by choosing the gear icon associated with the trust relationship.

SecureDX™ Home [Send](#) Receive Audit Logs SM ⚙️ ?

SecureDX > [Send](#) > Configure First Last (first.last@email.com)

Configure Trust Relationship

Sending To
🔒 First Last

Secret Code COPY ⋮

Regenerate the secret code associated with this trust relationship if it was deleted from your browser or exposed.

[REGENERATE SECRET CODE](#)

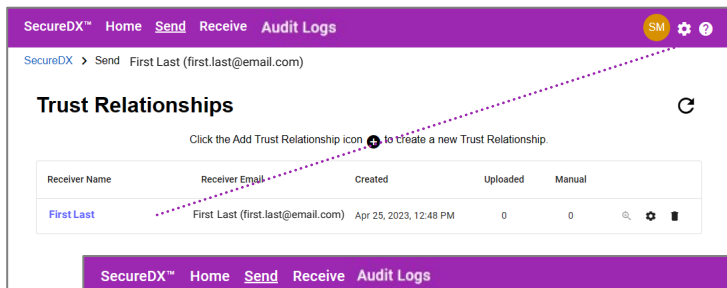

[Return to Trust Relationships](#)

Choose “Copy” or “Regenerate Secret Code”

3

Send A Secure File

Choose “Send” from the top navigation bar. Then, Select a Trust Relationship.

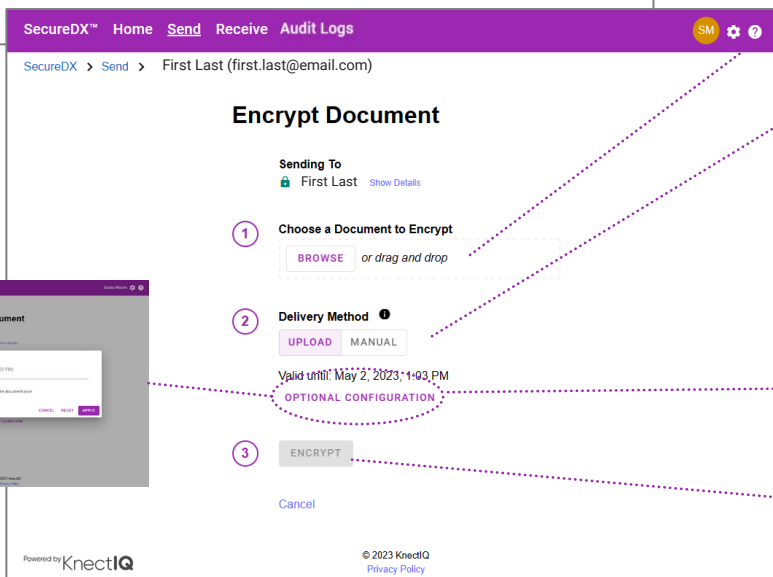

- Receiver must have registered an account with SecureDX prior to your ability to encrypt and send files to receiver.

Choose “Browse” or drag and drop a file (of any file type) from your computer into the box and the file name will show

Choose delivery options

1. **Upload:** This uploads and stores the encrypted file to the cloud for SecureDX to retrieve for the recipient

2. **Manual:** This downloads the encrypted file to you directly to deliver to the recipient using any delivery mechanism you choose

3. **Optional Configuration:** Allows you to choose an expiration date and restrict decryption/download to one-time-only.

Choose “ENCRYPT”

4 Receive A Secure File: (UPLOAD delivery mode)

[Cancel](#)

Choose "Receive" from the top navigation bar

Choose "DECRYPT"

Browse to and select, or drag/drop to this box, the encrypted file that was manually delivered to you via the sender's mechanism of choice

Choose "DECRYPT DOCUMENT"

Find decrypted file in your system downloads folder

● Settings: Back Up Secret Codes

The screenshot shows the SecureDX™ user interface. At the top, there is a navigation bar with 'SecureDX™ Home Send Receive Audit Logs' and a user profile 'SM' with a gear icon and a help icon. Below the navigation bar, the page title is 'SecureDX > Settings'. The main content area is titled 'Settings' and contains two cards. The left card is titled 'Back Up Secret Codes' and contains the text 'Back up your secret codes to protect against data loss and easily migrate to another browser.' and a purple button labeled 'BACK UP SECRET CODES'. The right card is titled 'Deactivate Browser' and contains the text 'Deactivate your browser to remove your account from this browser. Your account will not be deleted.' and a purple button labeled 'DEACTIVATE BROWSER'. At the bottom left, it says 'Powered by KnectIQ'. At the bottom center, it says '© 2023 KnectIQ Privacy Policy'.

Choose the gear icon from the top navigation bar

Choose "Back Up Secret Codes"

After you have protected your secret codes with a password, you will see the backup status has changed and the backup timestamp is posted.

If you forget the password you used to secure your secret codes, you will need to create a new password.

● Settings: Deactivate Browser

The screenshot shows the SecureDX user interface. At the top, there is a navigation bar with links for 'Home', 'Send', 'Receive', and 'Audit Logs'. On the right side of this bar, there are three icons: a yellow circle with 'SM', a gear icon, and a question mark icon. Below the navigation bar, the page title is 'SecureDX > Settings'. The main content area is titled 'Settings' and contains two cards. The left card is titled 'Back Up Secret Codes' and has a purple button labeled 'BACK UP SECRET CODES'. The right card is titled 'Deactivate Browser' and has a purple button labeled 'DEACTIVATE BROWSER'. At the bottom of the page, there is a footer with 'Powered by KnectIQ' on the left and '© 2023 KnectIQ Privacy Policy' on the right.

Choose the gear icon from the top navigation bar

Choose "Deactivate Browser"
